Tenant Bed Bug Prep Sheet

What You Need to Know

Prepared By Halt Pest Control

Bed bugs are very cryptic in nature, so proper treatment is crucial to help control them. Since bed bugs can hide anywhere, the following steps must be completed prior to treatment so that control can be achieved.

1. All bedding must be removed and laundered.
2. All dresser / night stand drawers must be emptied and the items laundered and placed in sealed plastic bags.
3. All items must be removed from closets and laundered and placed in sealed plastic bags.
4. All items must be removed from walls and stacked in the middle of the room so they can be inspected for bed bugs.
5. All bookshelves must be cleared off and the items placed in plastic bags.
6. All luggage must be empty.
7. People and pets need to vacate the location for a minimum of 4 hours following treatment.

Do not reuse plastic bags as this may result in transferring bed bugs to items that did not have them before. After the initial treatment, your mattress and box spring should be placed in a **Bed Bug Mattress Cover, as well as Climb Up Insect Interceptors.**

Thank you for your cooperation!
