## PREP SHEET

### Fleas

- Please remove personal and small items from carpeted area.
- Please remove items from under beds, couches, closet floors, etc., as these areas are especially attractive to fleas.
- Vacuum thoroughly before treatment and dispose of vacuum bag outside of home.
- Fish, birds and any other pets will have to be removed during treatment. Plants will not be affected. Any dog or cat needing treatment should be taken to a vet to be treated professionally at this time.
- You will be required to be out of the apartment, home or business for 4 hours unless otherwise noted.
- After this period you may resume normal activity. You need to vacuum everyday for 2 to 3 weeks after treatment and throw away your vacuum cleaner bag outside your house or apartment each time. This will cause the Fleas eggs to hatch and die.

### Ants

- Please remove all items from under sinks in kitchen and bathroom(s).
- Please move all items away from baseboards of all rooms where ants have been seen.

### Roaches & Silverfish

- Please remove all items from under sinks in kitchen and bathroom(s).
- Please clean out pantry and/or food cupboards.
- All shelves in pantries and/or cupboards must be vacant. This includes closets and closet floors.
- Please remove everything from around baseboards.
- Please remove everything from water heater closet area.

## **PULGAS**

- Por favor remueva los objetos personales y pequeños de las áreas alfombradas.
- Por favor remueva todos los artículos que estén abajo de las camas, sofás, piso del closet, etc., ya que dichos objetos atraen mucho a las pulgas.
- Pase la aspiradora minuciosamente antes de hacer el tratamiento y deseche la bolsa fuera de su casa.
- Peces, pájaros y otros animales domésticos tendrán que ser removidos antes de empezar el tratamiento. Las plantas no serán afectadas. Cualquier perro o gato que necesite tratamiento tendrá que ser llevado a esta hora a un veterinario para que reciba tratamiento profesional.
- Usted debe permanecer fuera durante 4 horas a menos que se le haya notificado algo diferente.
- Después del tratamiento usted puede resumir sus actividades normales. Si ve algunas pulgas, etc., pase la aspiradora minuciosamente y deseche la bolsa fuera de su hogar. Esto causará que los huevos se incuben y que las pulgas se mueran.

## **HORMIGAS**

- Por favor remueva todos los artículos que se encuentran abajo del fregadero en la cocina y del lavabo en el baño.
- Por favor remueva todos los artículos a lo largo de los zócalos donde haya visto a las hormigas.

## **CUCARACHAS Y PECES PLATEADOS**

- Por favor remueva todos los artículos que se encuentran en la cocina y el baño.
- Por favor limpie la despensa y las alacenas donde guarde comida
- Todas las alacenas y gavetas deben estar vacías. Esto incluye los closets y el piso de los closets.
- Por favor remueva todo a lo largo de los zócalos.
- Por favor remueva todo del closet del calentador de agua y a su alrededor.

**A N T F O R M A T I O N**

**PLEASE DO!**

INDOORS

- Tell us everywhere you see ants.
- Clean up spills (by removing alternative food sources, ants are more likely to feed exclusively on our bait).
- Vacuum thoroughly. A small crumb is a feast to an ant.
- Store food in ant-proof containers
- Empty trash containers frequently.
- Keep the dishwasher closed or empty.
- Pick up pet food when your pet is done eating.
- Rinse and store recyclable cans and bottles in ant-proof containers.
- Be patient. our bait is the most effective ant treatment available, however, it will take a little time to work.

OUTDOORS

- Trim shrubs and trees back so they do not touch the house.
- Clean gutters and storm drains.
- Keep pets away from treated areas for *at least 24 hours*.

**PLEASE DON'T!**

INDOORS

- Don't spray any insecticides or "squash" any ants. Killing worker ants will prevent them from returning to the colony with our bait.
- Don't use strong cleaners around the baits. Ants leave chemical trails so that others can find the bait.
- Don't remove or disturb the bait stations.

OUTDOORS

- Don't water your lawn for 24 hours after our bait application.
- Don't disturb any ant mounds. Ants that are agitated may not feed on the bait.
- Don't spray any insecticides outdoors.

**F L E A - O L O G Y**

**PLEASE DO!**

- Please stay out of residence for the period of time noted on this door hanger or until carpets are dry.
- If you have a pet please have a veterinarian prescribe a topical medication to prevent Fleas.
- Please vacuum thoroughly for 10 days after application and discard vacuum bags outside.
- Please allow time for treatment to be effective. If you notice Fleas vacuum again. Our treatment will last 7 months and re-treatments are usually not necessary.

**PLEASE DON'T!**

- Forget to remove all items from carpeted areas of floors, under beds and base of closets. Vacuum thoroughly before treatment and discard bag outside of residence.
- Forget to wash pet bedding and beds.
- Forget to cover fish tanks and turn off air pump. Also remove pets at time of treatment.
- "Bomb" or "Spray" anything after we have treated.
- Have carpets cleaned or shampooed after we treat.
